

Yontoo LLC

Yontoo LLC CULTURE

Mission Statement

Yontoo's mission is to enhance everyone's experience across all websites.

Vision

We founded Yontoo LLC to show that the Web can be so much more than individual pages. The beauty of Yontoo Layers Technology comes from the ability to horizontally cross the internet rather than the typical vertical website archive that you see all over the internet. Our layers take a backseat to the web page, still allowing the main site to be the center of attention, as it should always be.

Philosophy

For us, the future of the internet is about creating tools which cut across websites and allow users to maximize their internet experience within those individual websites.

FACTS & FIGURES

Yontoo LLC was founded in March 2008.

Yontoo LLC is a privately funded and privately held technology/software development firm.

Each month Yontoo LLC serves more than 3 billion layers to over 2.5 million users.

Of those users, 41.3% are in the US.

Yontoo Layers is currently available for Firefox 3.0, Internet Explorer 7.0 or 8.0, and Chrome. Unfortunately, we do not have a version of Yontoo Layers that will work with Safari, Opera, AOL, MSN, or IE 6.

What does Yontoo LLC do?

- Yontoo LLC is a software development and technology firm based out of Carlsbad, CA.
- Yontoo has developed Patent-pending proprietary software that creates virtual "layers" on existing websites also known as Yontoo Layers as well as applications supported by these layers.

Who are the founders of Yontoo?

Arie Trouw, Stuart Nowell, Michael Zinniger, & Kai Hankinson.

What is Yontoo Layers?

Yontoo Layers is an internet enabling technology platform that creates virtual layers that can be edited to create the appearance of having made changes to the underlying website.

Where can Yontoo Layers Be used?

Yontoo Layers works on any site on the Web, although the functionality comes from separate applications called layer apps which provide specific functionalities depending on what site you are on.

How Can Yontoo Layers Be Used?

- There are a variety of uses for Yontoo Layers, depending upon your perspective.
- An individual user can use any of the applications available to create an altered or extended web experience.
- A business can work in partnership with Yontoo to leverage our technology and create targeted campaigns.
- A person or group with a concept for an application can work alongside Yontoo to develop that application.

What Is The Future Of Yontoo Layers?

As the Yontoo Layers technology is refined you will see how indispensable the technology is. By creating an added dimension of interactivity on a website we are able to take Web 2.0 and push it to its limits!
